

Kevin Fan

+1-647-224-7332 | kevin.sw.fan@gmail.com | kevinfan.com

HCI researcher and engineer with 7+ YoE from native C++ to engines (Unity/UE5). Proven track record of designing and building interactive systems for emerging products (XR, mobiles/wearables, vehicles, digital twins, GenAI).

EXPERIENCE

Digital Experience Lead

Fujitsu

10/2023 – Current

Vancouver, Canada

- Develop a Digital Twin simulation platform for global supply chain analytics, integrating XR for interactive visualization and GenAI assistant for real-time decision-making.
- Build a synthetic data generation pipeline for computer vision, leveraging MetaHuman, Mass, Motion Matching, Chaos Physics (Unreal Engine/C++/Python).

Senior HCI Researcher

Huawei

03/2019 – 09/2023

Toronto, Canada

- Research and develop interactive systems for emerging technology and products in the domain of smartphones, watches, headsets, vehicle infotainments.
- Lead and deliver 4 R&D projects, managing and collaborating with cross-functional teams.
- Filed 8 patents (6 granted, 2 pending) on interaction methods, spatial UX, and real-time simulation.

Deep Learning Engineer

WrnchAI

04/2018 – 02/2019

Montreal, Canada

- Developed a human pose estimation pipeline including data preprocessing, heatmap generation, data augmentation in Tensorflow (C++/Python) based on RGB camera images.
- Utilized a VGG-based CNN architecture for facial keypoints training and estimation (Python).

Research Assistant & Postdoctoral Researcher

National Institute of Advanced Industrial Science and Technology

04/2016 – 03/2018

Tokyo, Japan

- Developed VR support (C++/Oculus SDK) for a Windows digital human software, enabling immersive embodiment experiences with motion capture.
- Built AR application (Hololens) for bringing digital humans to the real environment evaluation (Unity).
- Deployed XR technology to enhance human ergonomics analysis for consumer furniture products.

Research Intern

Microsoft Research Asia

05/2015 – 11/2015

Beijing, China

- Designed and built a wearable haptic interface for XR user notifications via electric muscle stimulation.

Research Intern

Singapore University of Technology and Design

11/2013 – 01/2014

Singapore

- Developed custom video passthrough HMD with Oculus DK1 using native SDK(C++/OpenGL), integrating with webcam-based computer vision optical flow analysis for motion detection.

EDUCATION

Keio University

Ph.D. in Human-Computer Interaction

Tokyo, Japan

09/2013 – 03/2017

Awards: Microsoft Research Asia Fellowship | Keio University Research Grant

Keio University

MS. in Human-Computer Interaction

Tokyo, Japan

09/2011 – 08/2013

Awards: Young Researcher's Award (Virtual Reality Society of Japan) | MEXT Scholarship

University of British Columbia

Bachelor of Applied Science in Software Engineering

Vancouver, Canada

09/2006 – 06/2010

Awards: President's Entrance Scholarship | B.C. Government Scholarship

TECHNICAL SKILLS

Languages

C++, C#, Python, Kotlin

XR Platforms

Oculus (Meta), HTC VIVE, HoloLens, GearVR/Cardboard (Android)

Game/Sim Engines

Unity, Unreal Engine, Nvidia Omniverse

Motion Capture

OptiTrack, Vicon, Leap Motion, Kinect

Machine Learning

Scikit-learn, PyTorch, Tensorflow

Hardware Tinkering

Arduino, Raspberry Pi, 3D Printing

Patents

- **Fan, S. W.**, Deng, Y., and Ye, J. (2024). Methods and systems for preventing motion sickness via postural analysis. US Patent App. 18/062,553
- Khan, T. A., **Fan, S. W.**, Changqing, Z., Xu, J., and Li, W. (2024). Devices, methods, systems, and media for an extended screen distributed user interface in augmented reality. US Patent 12,093,704
- **Fan, S. W.** (2023). Systems and methods for classifying touch events based on relative orientation. US Patent 11,797,100
- Changqing, Z., Akhtar, Y. W., **Fan, S. W.**, Xu, J., and Li, W. (2023). Methods and systems for rendering virtual objects in user-defined spatial boundary in extended reality environment. US Patent 11,640,700
- Khan, T. A., **Fan, S. W.**, and Li, W. (2023). Systems and methods for prediction-based driver assistance. US Patent 11,794,766
- Khan, T. A., **Fan, S. W.**, Changqing, Z., and Li, W. (2022). Devices, methods, systems, and media for selecting virtual objects for extended reality interaction. US Patent 11,327,630
- **Fan, S. W.**, Khan, T. A., and Li, W. (2022). Methods and systems for selection of objects. US Patent 11,475,642
- **Fan, S. W.**, Hengguang, Z., Xu, Q., and Li, W. (2021). System and method for video processing using a virtual reality device. US Patent App. 17/244,807
